

FOR IMMEDIATE RELEASE

EDi announces ownership change – Plans for the future.

Cary, North Carolina – March 10th, 2020

Engineered Designs, Inc. (EDi) is excited to announce the successful transfer of ownership from one of its founders, Tom Velez, to long time employees Glenn Key, Brad Wynne, and John Quiocho, preparing the company for future success with its next generation of leaders. Ginger Scoggins will remain as majority owner of the company and looks forward to collaborating with the new leaders.

When discussing the transition, Ms. Scoggins offered, “while this business will remain my focus for many years to come, it is time for us to look toward the next generation of owners that will lead this company into future decades, and these three employees have proven their dedication to this company thru their continued efforts over the years”.

Improvements going forward will focus maintaining and improving client satisfaction and interaction, marketing diversity, a focus on charitable efforts, and continued dedication to the staff.

Ms. Scoggins will continue to serve as company President, overseeing operations on a day-to-day basis. Mr. Key, Mr. Wynne, and Mr. Quiocho will all be named as company Vice-Presidents, and will continue to operate in Team Leader capacities for the near future. In addition, Mr. Wynne and Mr. Quiocho will rise to Senior Associate level within the firm, joining Mr. Key at this level.

The team at Engineered Designs, Inc. would like to congratulate the new owners and celebrate this leadership change, as well as thank all of our clients, partners and supporters who have worked with us through the years. We encourage feedback as we look to a bright future as well as continue to support our present relationships.

About Engineered Designs, Inc. - [Engineering Life Into Buildings](#)

Engineered Designs, Inc. is a team of professionals providing building systems design, energy analysis, and commissioning. Our professionals seek to design buildings that not only work, but also consume the lowest amount of energy and have minimal environmental impact. Through energy management and systems commissioning, we can assist owners in evaluating, optimizing, and maintaining building performance.
